- + 50,000 wfms/s waveform capture rate
- + waveform zooming (horizontal / vertical), and saving
- + FFT points (length, and resolution variable)
- + multi-window extension
- + user-friendly voice warning
- + 8 inch 800 x 600 pixels high def LCD
- + multi- communication interface : USB, VGA, and LAN

A multi-record length option, max 7.6M

multi-record length option - 760 / 7.6K / 76K / 760K / 7.6M, when at 7.6M record length, single channel still able to maintain 1GS/s sample rate (dual channels @ 500MS/s simultaneously). Deep record length, and high sample rate, adding continual waveform capture capability, all of these get you access to the fine details into the complicated signals, from which to find irregular, occasional events.

B powerful waveform capture rate

up to 50,000 wfms/s waveform capture rate, restoring random / low-probability event in fine details

C input impedance selectable - 1M Ω , and 50 Ω

1M Ω : suitable for testing / measuring less- super-high frequency, and large voltage signal

50 Ω : suitable for testing / measuring high frequency, RF signal

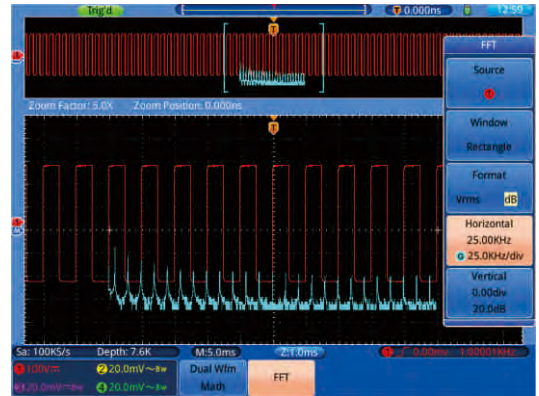

D multi-window extension

double-display, and proportion-zoom realizes waveform detail restoring when observing the whole outline

E FFT, and waveform display in the same screen

this function facilitates wave spectrum analyzing, and FFT points option available in 512 / 4K / 32K.

F user-friendly help menu

users is able to locate concrete help menu upon with touch control, and gesture-identifying

G Common output file formats supported

covering .bmp, .png, .jpg, and .bin, .csv format
